PROJECTS

Flamingo

It is a social media web application enabling users to register, upload photos, and showcase them on the homepage for others to view. Users have the flexibility to delete their photos later. The platform is developed using the Django framework

Photo editor

A straightforward photo editing application created as an Electron app using HTML, CSS, and JavaScript, with Electron JS. It operates as a standalone application, eliminating the need for a browser

Restaurant reservation website

A website for restaurant reservations where users can reserve tables and pre-order food, effectively minimizing wait times for meals. The website is developed using PHP.
